AZCO merges Industrial Engineering skills with Financial acumen to seek out sound procurement deals.

- Matching a client requirement with an innovative quality engineered solution
- Negotiating all technical and commercial aspects so as to ensure a viable deal
- Conducting Market research to ensure supplier pricing is market related
- Using our tried and tested procedures we manage the entire purchasing cycle for our client projects

Before cleaning the area we carry research with representatives of the Ministry of Environment on presence of rare sort of plants, trees and etc.

After research area will be roughly cleared

The holes of the construction site will be filled with sands

The trees will be cut off and their roots are totally uprooted

Before starting the work, permanent bench marks must be established at a suitable point in the construction site.

The orientation and trench lines of the building should be correctly laid out in the construction site

The location for the storage and stacking of the materials should be definitely set on the ground in the site.

Site preparation also includes fixing position of the site office, go downs, the guard and the labor shed, the access and existing roads for trucks and carts etc.

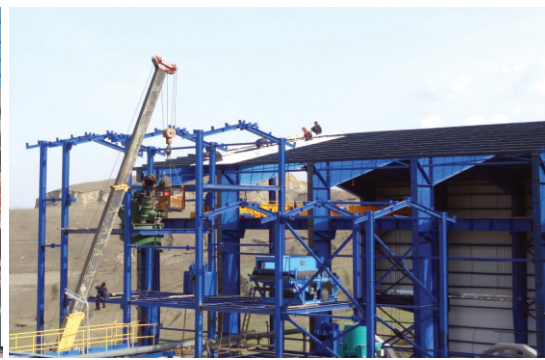

AZCO EPC gives special attention for Foundation. Construction of concrete foundation is divided into number of work activities with specific objectives and completion time for each activity is defined. Each activity for construction of concrete foundations has to be planned, as it requires specific equipments at every stage. Each activity for the construction of foundation requires different skill sets of workmen and different equipments. For a construction large construction projects, there can be many number of foundations to be casted on a single day. Therefore it is required to plan each and every activity of this construction. The project planner for foundation construction should determine the quantity of works involved in each activity and estimate the quantity of materials to be required.
